

## GAMING MACHINE, SERVER AND PROGRAM FOR PLURAL PLAYERS

### ABSTRACT

5           The invention provides a gaming machine, a server and program  
that amplify the sense of thrill by adding a gambling feature to  
a game. A poker gaming machine (1) determines the odds by changing  
the order of odds, which are prepared in advance in response to  
the difficulty in formation of winning combinations, whenever a  
10 player performs betting, wherein since no guarantee in securing  
that the more game media through repeated betting is given, a  
gambling feature is brought about in the betting itself, and the  
sense of thrill enjoyed by a player can be amplified. In addition,  
it becomes possible to obtain the sense of thrill experienced in  
15 bluffing among a plurality of players when the gaming machine,  
server and program are applied to a gaming machine for single player.
